

SYLLABUS

Competitive Environment and Company's Competitiveness 2021-2022

1. Program information

1.1	Higher education institution	University of Pitești
1.2	Faculty	Faculty of Economics and Law
1.3	Department	Management and Business Administration
1.4	Field of study	Management
1.5	Cycle of studies	Master
1.6	Program of studies	Strategic Management and Business Development

2. Course information

2.1 Course information					Competitive Environment and Company's Competitiveness						
2.2	Course teacher				PhD Lecturer Elena JIANU						
2.3	Seminar teacher				PhD Lecturer Elena JIANU						
2.4	Year of studies	II	2.5	Semester	I	2.6	Evaluation type	E	2.7	Course type	Mandatory

3. Total estimated time

3.1	Number of hours per week	3	3.2	of which course	2	3.3	S / L / P	1
3.4	Total hours from curriculum	42	3.5	of which course	28	3.6	S / L / P	14
Time distribution of individual study								hours
Study the textbook, course support, bibliography and notes								42
Further reading in the library, on the online platforms and field								42
Preparing seminars, homework, portfolios and essays								42
Tutoring								3
Examinations								2
Other activities								2
3.7	Total hours of individual study	133						
3.8	Total hours per semester	175						
3.9	Number of credits	7						

4. Prerequisites

4.1	of curriculum	Elements of management and strategic management
4.2	of competences	Capacities of analysis, synthesis and divergent thinking

5. Requirements

5.1	for courses	- Classroom equipping with video-projector
5.2	for seminars	- Proper equipping of the seminar hall - The deadlines for homework' submission

6. Specific acquired competences

Professional competences	<ul style="list-style-type: none"> ▪ C2. Making decision scenarios and forecasting their potential impact – 2 CP; ▪ C5. Analyzing and interpreting market information for decision making in business – 3 CP; ▪ C6. Substantiating strategic decisions to attract and retain customers, using modern sale methods and techniques – 2 CP.
Transversal competences	

7. Course objectives

7.1 General objective	To provide knowledge to students on specific aspects of the current business environment, understanding the world and European economic trends and management practices for creating and implementing companies' strategies in the current economic climate.
7.2 Specific objectives	<u>A. Cognitive objectives</u> Knowledge of theoretical and methodological elements for a competitive environment and firm's competitiveness; Understand the need for a strategic approach by companies in the current economic context; Identify the types of strategies and the possibility of their application in companies' management practice; Develop strategic thinking of the future management specialists; Understand the terms such as: competitive, competitive advantage, competition and competition types and their use in managerial practice.

	<p>B. SYLLABUS

Organizational Change Management, 2021-2022

1. Program information

1.1. Higher education institution	University of Pitești
1.2. Faculty	Faculty of Economics and Law
1.3. Department	Management and Business Administration
1.4. Field of studies	Management
1.5. Cycle of studies	Master
1.6. Program of studies	Strategic Management and Business Development

2. Course information

2. Course information												
2.1	Name					Organizational Change Management						
2.2	Course teacher					PhD Lecturer Smaranda TOMA						
2.3	Seminar teacher					PhD Lecturer Smaranda TOMA						
2.4	Year of studies	II	2.5	Semester	I	2.6	Evaluation type	Examination	2.7	Course type	mandatory	

3. Total estimated time

3.1	Number of hours per week	3	3.2	of which course	2	3.3	S / L / P	1
3.4	Total hours from curriculum	42	3.5	of which seminar	28	3.6	S / L / P	14
Time distribution								hours
Study the textbook, course support, bibliography and notes								42
Further reading in the library, on the online platforms and field								42
Preparing seminars, homework, portfolios and essays								40
Tutoring								4
Examinations								2
Other activities								3
3.7	Total hours of individual study	133						
3.8	Total hours per semester	175						
3.9	Number of credits	7						

4. Prerequisites

4.1. of curriculum	The basics of Management and Human Resource Management, studied during the Bachelor cycle.
4.2. of competences	analysis, synthesis, divergent thinking

5. Requirements

5.1. for courses	The lecture room should be equipped with a video-projector.
5.2. for seminars	The seminar room should be equipped with a video-projector and at least 10 computers.

6. Specific acquired competences

Professional competences	C1 Evaluating opportunities and risks specific to business environment in order to design organizational changes – 1 CP; C2 Making decision scenarios and forecasting their potential impact – 2 CP; C3 Applying strategic management systems under certainty, uncertainty and risk – 1 CP; C4 Revaluating the entrepreneurial skills in a competitive environment – 1 CP; C5 Analyzing and interpreting market information for decision making in business – 1 CP.
Transversal competences	TC2 Planning and organizing human resources within a group or an organization, being aware of the responsibility for professional results – 1 CP.

7. Course objectives (based on the specific acquired competences)

7.1. General objective	The course <i>Organizational Change Management</i> transmits the students the necessity of going through this process in the evolution of a company, but also the need to apply it when a given situation requires it as a solution. By understanding the reasons behind changes in the company, students realize the importance of personal involvement in the change process in two main directions: the rapid elimination of personal resistance to change and the active support of the transition process the company goes through. It also familiarize the students with the tools and levers to successfully program and implement a change process within a company or a department.
------------------------	--

7.2. Specific objectives	<p><i>A. Cognitive objectives</i></p> <ol style="list-style-type: none"> 1. Defining correctly the concept of organizational change. 2. Knowing and understanding the determining factors of organizational change. 3. Understanding the need for organizational change and its implications. 4. Learning how to design and implement methods and techniques for change management. <p><i>B. Procedural objectives</i></p> <ol style="list-style-type: none"> 1. Drafting a team project; 2. Solving applications and case studies for each method and technique; 3. Developing a systemic vision to create and use managerial tools; 4. Using self-assessment learning methods. <p><i>C. Attitudinal objectives</i></p> <ol style="list-style-type: none"> 1. Respecting the rules of professional deontology, based on explicit value options of a specialist in management; 2. Cooperation and teamwork to solve various job tasks; 3. Using specific methods to develop plans of personal and professional development.
--------------------------	--

8. Contents

8.1. Course		No. of hours	Teaching methods	Observations Resources
1	Introduction to change management 1.1. Clarifying the concept of change management 1.2. Change management and performance management 1.3. Change management and project management 1.4. The importance of change management 1.5. Reasons why change initiatives are / are not successful	2	Lecture Heuristic conversation Problem solving Explanation Debate	Demonstration using modern audio-visual means (short PowerPoint presentations)
2	Managing change: a process perspective 2.1. Process models of change 2.2. Leading change: a process perspective	4		
3	Recognizing the need for change and starting the change process 3.1. Patterns of change 3.2. Recognizing a need or opportunity for change 3.3. Starting the change 3.4. Building change relationships	4		
4	Diagnosing what needs to be changed 4.1. Diagnosis 4.2. Gathering and interpreting information	2		
5	Leading and managing the people issues 5.1. The role of leadership in change management 5.2. Power, politics and stakeholder management 5.3. Responsible change management: an ethical approach 5.4. Managing context to promote ethical practice 5.5. Communicating change 5.6. Motivating others to change 5.7. Supporting others through change	4		
6	Planning and preparing for change 6.1. Shaping implementation strategies 6.2. Developing a change plan 6.3. Types of intervention 6.4. Action research 6.5. Appreciative inquiry 6.6. Training and development 6.7. High performance management 6.8. Business process re-engineering 6.9. Lean 6.10. Culture profiling 6.11. Value innovation 6.12. Selecting interventions	4		
7	Implementing change 7.1. Implementing change 7.2. Reviewing and keeping the change on track	4		
8	Sustaining change 8.1. Making change stick 8.2. Spreading change	2		

9	Learning 9.1. Change managers learning from their own experience 9.2. Facilitating collective learning 9.3. Pulling it all together: a concluding case study	2

8. Course contents

8.1. Course		No. of hours	Teaching methods	Observations Resources
1	Concepts and basic knowledge of management 1.1. Multidisciplinary Nature of KM 1.2. Organizational Perspectives on Knowledge Management 1.3. KM for Individuals, Communities, and Organizations	2	Lecture Heuristic conversation Problem solving Explanation Debate	Demonstration using modern audio-visual means (short PowerPoint presentations)
2	Innovation process 2.1. What business processes are involved in the design of a new surveillance technique? What should co-investigators and collaborators read in order to understand how new products are conceived, designed and produced? 2.2. How might combinations of new and existing knowledge produce specific innovations in technology, which then become accepted into practice? 2.3. What possible innovations are ruled out or silenced? At what bureaucratic level does this "weeding out" process occur?	4		
3	Innovation management 3.1. Modeling 3.2. The ideation sandbox 3.3. Creative combination	2		
4	Creativity in the context of innovation 4.1. Design 4.2. Evolution of 'Design'	2		
5	Technology transfer process 5.1. Unravelling the process 5.2. The power of people	4		
6	Technology transfer management 6.1. Technology and the learning process 6.2. Types of transferred technology and assessing its impact 6.3. Technology and competitiveness 6.4. Factors influencing successful technology transfer to enterprises 6.5. Technology and creation of wealth 6.6. On globalization 6.7. Competitiveness	4		
7	The tools and technology transfer 7.1. Five tools to optimize technology transfer 7.2. A Support Model 7.3. Technology Transfer Is Driven by Domain-Specific Problems 7.4. A Procedure for Tracking Technology Transfer Needs 7.5. A Project for Improving the Documentation	2		
8	Technology transfer organizations 8.1. Concepts, Process, and Contextual Factors. Technology Transfer between Science and Industry 8.2. Technology Transfer and Economic Development	4		

	8.3. The Technology Commercialization Process: A Simplified View 8.4. The Potential Benefits 8.5. Contextual Factors 8.6. Institutional and Market Failures 8.7. Incentive misalignment problem in a principal-agent context 8.8. Access to specialized resources and supportive mechanisms			
9	Project Planning innovation or technology transfer (ITT) 9.1. Definitions 9.2. Organizational theory foundations 9.3. Technology transfer process types	2		
10	Specific occupations innovation and technology transfer 10.1. Industry and research institution working together towards a knowledge economy 10.2. Promoting research institutions – SME interactions 10.3. Measuring progress	2

8.2. Seminar		No. of hours	Teaching methods	Observations Resources
1	Getting started in management of technology transfer in the context of globalization Debates on knowledge characteristics include the following: - - Use of knowledge does not consume it. - Transferal of knowledge does not result in losing it. - Knowledge is abundant, but the ability to use it is scarce. The focus of intellectual capital management (ICM), on the other hand, is on those pieces of knowledge that are of business value to the organization — referred to as intellectual capital or assets Knowledge — the insights, understandings, and practical know-how that we all possess — is the fundamental resource that allows us to function intelligently.	2	Conversation Problem solving Reflection exercises Debate Explanation Teamwork	Demonstration using modern audio-visual means (short PowerPoint presentations, videos etc.) Computer assisted instruction, modeling
2	Presentation of project structure. Example: Case Study	2	Project presentations	
3	Creativity - Warning - New Mode Decision Making	2		
4	Case studies on the effects of technological change on the global economic structure and the transformations in the way companies and nations organize production, trade goods, invest capital, and develop new products and processes	4		
5	Presentation of the project	2		
6	Final evaluation	2

*** NOTES:**

1. The seminars consists of projects, direct interventions, debates, teamwork etc., activities considered in the final evaluation.
2. The projects are conducted in teams.

9. Course contents corroboration with the demands of the epistemic community representatives, professional associations and related employers.

- the accuracy of using concepts and theories learned during this course will meet employers' requirements;
- the procedural and attitudinal competencies to be acquired during this course will meet the expectations of business professional associations and employers.

Note: The University of Pitești evaluates periodically the degree of satisfaction of the employers' representatives towards the professional and transversal competences acquired by our graduates.

10. Evaluation

Activity type	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share of final mark
10.4 Course	- written exam: the quality and consistency of treating subjects; - logical coherence; - assimilation degree of specialized language.	Test papers during the semester Final evaluation	10% 50%
10.5 Seminar	- attendance and active participation during the seminars, solving the case studies; - compliance with the requirements of the project .	Attendance and activity at the seminar Evaluating student's products and interventions during the seminars Evaluating student's participation in project making and presentation	20% 20%
10.6 Minimum performance standard	Understand the effects of technological change on the global economic structure and the transformations in the way companies and nations organize production, trade goods, invest capital, and develop new products and processes.

*** NOTES:**

1. The seminars consists of projects, direct interventions, debates, teamwork etc., activities considered in the final evaluation.
2. The projects are conducted in teams.

9. Course contents corroboration with the demands of the epistemic community representatives, professional associations and related employers.

- the accuracy of using concepts and theories learned during this course will meet employers' requirements;
- the procedural and attitudinal competencies to be acquired during this course will meet the expectations of business professional associations and employers.

Note: The University of Pitești evaluates periodically the degree of satisfaction of the employers' representatives towards the professional and transversal competences acquired by our graduates.

10. Evaluation

Activity type	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share of final mark
10.4 Course	- written exam: the quality and consistency of treating subjects; - logical coherence; - assimilation degree of specialized language.	Final evaluation	30%
10.5 Seminar	- active participation during the seminars, solving the case studies; - compliance with the requirements of the project .	Involvement in seminar activities (case studies, roll playing)	10%
		case study	30%
		project evaluation (quantitative research)	30%
10.6 Minimum performance standard	Minimum requirements for the pass mark 5: achieving the following minimum skills C 6. Analyzing and interpreting market information for decision making in business.

SYLLABUS
Decision Making by Methods of Operational Research
2021-2022

1. Program information

1.1	Higher education institution	University of Pitești
1.2	Faculty	Faculty of Economics and Law
1.3	Department	Management and Business Administration
1.4	Field of studies	Management
1.5	Cycle of studies	Master
1.6	Program of studies	Strategic Management and Business Development

2. Course information

2. Course information												
2.1	Name					Decision Making by Methods of Operational Research						
2.2	Course teacher					PhD Associate Professor Doruleț GRĂDINARU						
2.3	Seminar teacher					PhD Assistant Professor Doruleț GRĂDINARU						
2.4	Year of studies	II	2.5	Semester	II	2.6	Evaluation type	E	2.7	Course type	mandatory	

3. Total estimated time

3.1	Number of hours per week	4	3.2	of which course	2	3.3	S / L / P	1 + 1
3.4	Total hours from curriculum	48	3.5	of which course	24	3.6	S / L / P	12 + 12
Time distribution								hours
Study the textbook, course support, bibliography and notes								40
Further reading in the library, on the online platforms and field								40
Preparing seminars, homework, portfolios and essays								40
Tutoring								4
Examinations								2
Other activities								1
3.7	Total hours of individual study	127						
3.8	Total hours per semester	175						
3.9	Number of credits	7						

4. Prerequisites

4.1	of curriculum	The basics of Management and Mathematics Applied in Economics
4.2	of competences	Capacity of analysis, synthesis, divergent thinking

5. Requirements

5.1	for courses	Endowment of the lecture rooms with video projectors
5.2	for seminars	This seminar room should be equipped with a video projector and computers

6. Specific acquired competences

Professional competences	<ul style="list-style-type: none"> ▪ C1. Evaluating opportunities and risks specific to business environment in order to design organizational changes – 2 CP; ▪ C2. Making decision scenarios and forecasting their potential impact – 2 CP; ▪ C3. Applying strategic management systems under certainty, uncertainty and risk – 2 CP; ▪ C4. Reevaluating the entrepreneurial skills in a competitive environment – 1 CP.
Transversal competences	

7. Course objectives (based on the specific acquired competences)

7.1 General objective	The course Decision Making by Methods of Operational Research transmits the students the need to implement sustainable development strategies and policies, evaluated in a coordinated way and taken into account in decision making. Developing students' abilities and skills of using the main methods of operational research in decision making on mathematical bases.
7.2 Specific objectives	A. Cognitive objectives <ol style="list-style-type: none"> 1. Knowing and understanding the concept of operational research; 2. Working with algorithms specific to decision theory and optimization processes; 3. Acquiring linear programming models, graph theory, game theory and decision theory; 4. Explaining, interpreting and approaching scientifically the complex problems that occur in company management, in order to develop the best decisions; 5. Defining correctly the subject of "Decision Making by Methods of Operational Research" and establishing its connections with other economic sciences.

	<p>B. Procedural objectives</p> <ol style="list-style-type: none"> 1. Solving applications and case studies related to decision making using algorithms of operational research; 2. Identifying concrete situations to apply the methods of operational research; 3. Familiarizing students with completing the steps of operational research in solving the problems of an organization; <p>C. Attitudinal objectives</p> <ol style="list-style-type: none"> 1. Ability to work in a team 2. Respect in the rules of professional deontology based on explicit value
--	--

8. Contents

8.1. Course		No. of hours	Teaching methods	Observations Resources
1	THE THEORY OF DECISION 1.1 The economic decision-making process 1.2 Methods and management techniques using elements of theory of decision	2	- lecture - debate with fictitious opponent - graphic organizer	(Other) resources used: Short presentations in Power Point for the stimulation of the reflection
2	LINEAR PROGRAMMING AS MATHEMATICAL METHOD OF SOLVING OPTIMIZATION PROBLEMS 2.1 Economic problems leading in linear programming models 2.2 The mathematical form a problem of P.L. 2.3 Elements on vectorial space 2.4 Solutions of a linear programming problem	2		
3	SIMPLEX PRIMAL ALGORITHM 3.1 The mathematic bases of the Primal Simplex method. Simplex tabel. Algorithm description 3.2 Simplex algorithm for different types of problems	4		
4	DUALITY IN LINEAR PROGRAMMING. SIMPLLEX DUAL ALGORITHM 4.1 Duality in linear programming 4.2 Simplex dual algorithm	4		
5	THE USE OF LINEAR PROGRAM IN THE PRACTICAL SOLVING OF TRANSPORT PROBLEMS IN LOGISTICS OF THE ENTERPRISE 5.1 Solving transport problems unbalanced type 5.2 Solving balanced type transport problems	4		
6	FORRESTER SIMULATION METHOD IN THE MANAGEMENT OF DYNAMIC SYSTEMS 6.1 Economic-mathematical modeling, the bases of foundation and decision-making 6.2 The Forrester simulation	4		
7	THE USE OF FORRESTER TECHNIQUES IN THE MODELING OF TRANSPORT PROBLEMS 7.1 Transport of primary materials, materials and goods 7.2 The use of Forrester techniques in the management transport undertakings	4

8.2. Seminar		No. of hours	Teaching methods	Observations Resources
1	The mathematical form a problem of P.L. Solutions of a linear programming problem Methods of solving decisional, multicriterial problems in conditions of certainty, without utilities	1	- Questioning - Debate - Working group - Conversation - Heuristic approach	Case study, homework presentation, check list Computer assisted instruction, modeling
2	Forms of presentation of a linear programming problem Combined use of the variable variables and artificial variables to obtain the standard work form Switching from canonical form to standard form	2		
3	Simplex algorithm for initial solution problems Simplex algorithm without initial solutions and form restrictions Simplex algorithm without initial solutions and form restrictions $Ax = b, b \geq 0, x \geq 0$ / 59 Simplex algorithm for problems without initial solutions and form < restrictions $Ax=b, b \geq 0, x \geq 0$ / >	2		
4	Determining the Optimal Solution of a P.L. through its duality The dual simplex algorithm for dual-core solutions - basic issues Dual simplex algorithm for problems without dual possible basic solution	2		
5	Determining the optimal solution Determining a possible basic, non-generated, initial solution	1		
6	Microstructure of the feedback loop, consideration of the time factor and axioms of the structure Other examples of Forrester simulations The equation model of a dynamic system and basic structures used in building dynamic Flow diagram of a dynamic system	2		
7	The use of Forrester techniques in the management transport undertakings	2		
Project 1. Presentation of the company 1.1. Object of activity 1.2. Characterization of the products (services) of the company 1.3. Structural organization 1.4. Possible changes that took place within the company 2. Application of management methods and techniques using the decision theory 2.1. . Models of LP problems. Explaining a linear program 2.2. The dual simplex algorithm. Obtaining a dual explicit form 2.3. Getting the starting solution. Determining the optimal solution 2.4. Hamiltonian roads and circuits. The problem of optimum value tree 2.5. Deterministic and stochastic models of storage. Determining the safety stock 3. Proposals for the increase of the efficiency of the company by emphasizing the creative side of the management		4 4 4

9. Course contents corroboration with the demands of epistemic community representatives, professional associations and related employers.

- The precision and the accuracy in the use of the concepts and theories learned within the discipline – will meet the expectations of the epistemic/academic community representatives within the field of education sciences
- The procedural and attitudinal qualifications to be acquired through this discipline - will meet the expectations of the professional associations representatives and of the employers in the business environment.

Note: Periodically, it will be assessed the degree in which the expectations of the representatives of the academic community and of the employers regarding the professional and transversal qualifications are met by the graduates of the Decision making by methods of operational research program

10. Evaluation

Activity type	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share of final mark
10.4 Course	- accuracy and completeness of knowledge - logical coherence - degree of assimilation of the specialized language	- Final assessment	50 %
10.5 Seminar / Project	• Attendance and seminar activity - assessment of responses to the questions raised by the teacher and of active participation of each student in the solving of the case studies	• Free presentation of the student and the oral questioning in the form of dialogue	20%
	Test – solving applications • Project – applications proposed by the teacher on the methodology of implementing the changes will be solved. The level of complying with the requirements will be assessed	• Test - Oral presentation of the homework - Oral questioning	10% 20%
10.6 Minimum standard of performance	1. Communication of information using correctly the scientific language with respect to the field of the methods of operational research 2. Knowledge of the basic concepts pertaining to the discipline “ Decision making by methods of operational research 3. The ability to use the methods of stimulating creativity in the modeling of managerial decision 4. Grade 5 in the final assessment

Tutoring								4
Examinations								4
Other activities								4
3.7	Total hours of individual study	76						
3.8	Total hours per semester	100						
3.9	Number of credits	4						

4. Prerequisites

4.1	of curriculum	The basics of Management Techniques and Tools, Marketing Strategies and Politics, Business Development Strategies Through Projects, Negotiation and Partnership
4.2	of competences	analysis, synthesis, divergent thinking

5. Requirements

5.1	for courses	-
5.2	for seminars / projects	-

6. Specific acquired competences

Professional competences	<ul style="list-style-type: none"> ▪ C1. Evaluating opportunities and risks specific to business environment in order to design organizational changes – 1 CP; ▪ C2. Making decision scenarios and forecasting their potential impact – 1 CP; ▪ C3. Applying strategic management systems under certainty, uncertainty and risk – 1 CP; ▪ C5. Analyzing and interpreting market information for decision making in business – 1 CP.
Transversal competences	

7. Course objectives (based on the specific acquired competences)

7.1. General objective	The course transmits the master students the need to recognize the positive contributions of entrepreneurship to society, to describe the characteristics of successful entrepreneurs and to develop the business plan.
7.2. Specific objectives	<p><i>A. Cognitive objectives cognitive</i></p> <ol style="list-style-type: none"> 1. Familiarizing master students with social entrepreneurship and social responsibility. 2. Developing entrepreneurial skills in the development of a business plan. 3. Assuming the business decision and planning its implementation.

	<p>B. Procedural objectives</p> <ol style="list-style-type: none"> 1. Evaluating opportunities and risks specific to business. 2. Identifying the strategies for business growth. 3. Developing constructive attitudes in various organizational contexts. 4. Analyzing and interpreting market information for decision making in business <p>C. Attitudinal objectives</p> <ol style="list-style-type: none"> 1. Cooperation and teamwork to solve various job tasks; 2. Using specific methods to develop plans of personal and professional development.

SYLLABUS
STRATEGIES, METHODS AND TECHNIQUES OF SALES DEVELOPMENT
2021-2022

1. Program information

1.1. Higher education institution	University of Pitești
1.2. Faculty	Faculty of Economics and Law
1.3. Department	Management and Business Administration
1.4. Field of studies	Management
1.5. Cycle of studies	Master
1.6. Program of studies	Strategic Management and Business Development

2. Course information

2. Course information											
2.1	Name					Strategies, Methods and Techniques of Sales Development					
2.2	Course teacher					PhD Assistant Professor Mădălina BRUTU					
2.3	Seminar teacher					PhD Assistant Professor Mădălina BRUTU					
2.4	Year of studies	II	2.5	Semester	II	2.6	Evaluation type	Examination	2.7	Course type	mandatory

3. Total estimated time

3.1	Number of hours per week	3	3.2	of which course	2	3.3	S / L / P	1
3.4	Total hours from curriculum	36	3.5	of which course	24	3.6	S / L / P	12
Time distribution								hours
Study the textbook, course support, bibliography and notes								36
Further reading in the library, on the online platforms and field								36
Preparing seminars, homework, portfolios and essays								36
Tutoring								2
Examinations								2
Other activities								2
3.7	Total hours of individual study	114						
3.8	Total hours per semester	150						
3.9	Number of credits	6						

4. Prerequisites

4.1. of curriculum	The basics of Management, Commercial Management and Marketing Strategies and Politics.
4.2. of competences	analysis, synthesis, divergent thinking

5. Requirements

5.1. for courses	The lecture room should be equipped with a video-projector.
5.2. for seminars	The seminar room should be equipped classically.

6. Specific acquired competences

Professional competences	<ul style="list-style-type: none"> C5. Analyzing and interpreting market information for decision making in business – 2 CP; C6. Substantiating strategic decisions to attract and retain customers, using modern sale methods and techniques – 4 CP.
Transversal competences	

7. Course objectives (based on the specific acquired competences)

7.1. General objective	Familiarizing master students with the strategies, methods and techniques of sales development.
7.2. Specific objectives	<p><i>A. Cognitive objectives</i></p> <ol style="list-style-type: none"> 1. Learning the techniques of sales force sizing; 2. Familiarizing students with the tools of developing sales strategies; 3. Assuming the most effective sales strategies; 4. Learning the techniques in prospecting sales activity; 5. Identifying ways to rationalize the sales process;

	<p>6. Presenting modern sales methods: direct sales and Internet sales; 7. Familiarizing students with the methods and techniques of improving sales activity: strategic diagnosis, Six Sigma, TPS.</p> <p>B. Procedural objectives</p> <p>1. Managerial theories specific to the field of sales. 2. Identifying some concrete situations to apply the methods and techniques of sales development.</p> <p>C. Attitudinal objectives</p> <p>1. Respecting the ethics in the profession of seller 2. Cooperation and teamwork to solve various job tasks; 3. Using specific methods to develop plans of personal and professional development.</p>
--	---

8. Contents

8.1. Course		No. of hours	Teaching methods	Observations Resources
1	The sales activity - an essential factor of company competitiveness: the place and role of sales within a company, defining the activity of sales, marketing versus sales	2	Lecture Heuristic conversation Problem solving Explanation Debate	Demonstration using modern audio-visual means (short PowerPoint presentations)
2	Types of sales: the main classifications of sales types	2		
3	The philosophy of strategic management of sales: defining the sales strategy, defining the strategic management, approaching the strategic process in sales	2		
4	Forecasts in sales – an essential component of strategic management of sales: the importance of forecasts, their beneficiaries, forecasting methods and models	2		
5	Methods and techniques used in developing sales strategies: SWOT analysis, analysis of competitive external environment, BCG, General Electric, Arthur D. Little	4		
6	Developing some modern types of sales: direct sales and Internet sales	2		
7	Developing sales by the method of diagnosing the managerial resources of the sales subsystem	2		
8	Developing and improving sales activity by the method Total Performance Scorecard	4		
9	Six Sigma – a technique to redesign the sales system	2		
10	Final evaluation	2

*** NOTES:**

1. The seminars consists of projects, direct interventions, debates, teamwork etc., activities considered in the final evaluation.
2. The projects are conducted in teams.

9. Course contents corroboration with the demands of the epistemic community representatives, professional associations and related employers.

- Learning correctly the specific concepts of strategies, methods and techniques of sales development in order to meet sales employers' requirements.
- The procedural and attitudinal competencies to be acquired during this course will meet the expectations of sales employers.

Note: The University of Pitești evaluates periodically the degree of satisfaction of the employers' representatives towards the professional and transversal competences acquired by our graduates.

10. Evaluation

Activity type	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share of final mark
10.4 Course	- written exam: the quality and consistency of treating subjects; - logical coherence; - assimilation degree of specialized language.	Test papers during the semester	10%
		Final evaluation	50%
10.5 Seminar	- attendance and active participation during the seminars, solving the case studies; - compliance with the requirements of the project .	Attendance Evaluating student's products and interventions during the seminars	20%
		Evaluating student's participation in project making and presentation	20%
10.6 Minimum performance standard	Minimum requirements for the pass mark 5: achieving the following minimum skills: A1, A2, A3, B1, B2, C1.

SYLLABUS
Discursive Practices in Business. Applied Competencies
2021-2022

1. Program information

1.1. Higher education institution	University of Pitești
1.2. Faculty	Faculty of Economics and Law
1.3. Department	Management and Business Administration
1.4. Field of studies	Management
1.5. Cycle of studies	Master
1.6. Program of studies	Strategic Management and Business Development

2. Course information

2.1	Name	Discursive Practices in Business. Applied Competencies									
2.2	Course teacher	-									
2.3	Seminar teacher	PhD Lecturer Smaranda TOMA									
2.4	Year of studies	II	2.5	Semester	II	2.6	Evaluation type	colloquy	2.7	Course type	mandatory

3. Total estimated time

3.1	Number of hours per week	2	3.2	of which course	-	3.3	S / L / P	2
3.4	Total hours from curriculum	24	3.5	of which course	-	3.6	S / L / P	24
Time distribution								hours
Study the textbook, course support, bibliography and notes								20
Further reading in the library, on the online platforms and field								24
Preparing seminars, homework, portfolios and essays								24
Tutoring								3
Examinations								2
Other activities								3
3.7	Total hours of individual study	76						
3.8	Total hours per semester	100						
3.9	Number of credits	4						

4. Prerequisites

4.1. of curriculum	Business English, Business Communication, Rhetoric and Argumentation in the Organizational Environment
4.2. of competences	analysis, synthesis, divergent thinking

5. Requirements

5.1. for courses	-
5.2. for seminars	The seminar room should be equipped with a video-projector and one computer (laptop) with speakers.

6. Specific acquired competences

Professional competences	<ul style="list-style-type: none"> ▪ C4 Revaluating the entrepreneurial skills in a competitive environment – 1 CP
Transversal competences	<ul style="list-style-type: none"> ▪ TC1 - Applying the rules and values of professional ethics in decision making and achieving independently or in groups the complex tasks / objectives at work – 1 CP; ▪ TC2 - Planning and organizing human resources within a group or an organization, being aware of the responsibility for professional results – 1 CP; ▪ TC3 - Assuming the need for continuous training to create the premises for career development and adapting the professional and managerial skills to a dynamic economic environment – 1 CP.

7. Course objectives (based on the specific acquired competences)

7.1. General objective	<p>As the global economy grows, companies from different countries increasingly have to work, trade and communicate with each other. Therefore, communication in an international language becomes imperative. English is often the language used for this communication.</p> <p>These seminars helps students to understand the principles of business communication; to produce accessible, well designed every day writing and compelling presentations and speeches; to prepare and project high quality presentations and speeches; to listen and speak during normal business activities</p>
------------------------	--

	<p>such as meetings, interviews, telephone conversation or negotiations; to adapt written and oral communication skills for achieving leading strategic business goals.</p> <p>These seminars help students improve their written and oral communications so they will be better equipped to accomplish their educational and professional goals. Students master effective business communication in multiple forms: from written materials to oral presentations and command of body language.</p>
7.2. Specific objectives	<p>The seminars also cover discursive techniques, the composition, structure and how to deliver presentations. They also address other issues like body language, visuals, and interaction with the audience.</p> <p>Students master the elements of business rhetoric and become adept at strategies for successfully conveying valuable knowledge and a leadership vision that persuades readers and motivates organizations.</p> <p>Students learn powerful and innovative techniques drawn from multiple sources, including media, quantitative and visual narratives. Each student produces written projects and oral presentations, and each student receives critical feedback and individual support.</p>

5.2. for seminars	The seminar room should be equipped with a video-projector and at least 10 computers.

6. Specific acquired competences

Professional competences	C1. <i>Evaluating opportunities and risks specific to business environment in order to design organizational changes</i> – 1CP; C2. <i>Making decision scenarios and forecasting their potential impact</i> – 1CP; C3. <i>Applying strategic management systems under certainty, uncertainty and risk</i> – 1CP; C4. <i>Revaluating the entrepreneurial skills in a competitive environment</i> – 1CP.
Transversal competences	

7. Course objectives (based on the specific acquired competences)

7.1. General objective	The course Strategies and Policies for Sustainable Business Development transmits the students the need to implement sustainable development strategies and policies, evaluated in a coordinated way and taken into account in decision making. By adopting sustainable practices, companies can gain competitive edge, increase their market share, and boost shareholder value. The growing demand for 'green' products has created major new markets in which sharp-eyed eco-entrepreneurs are reaping rewards. This course explains the strategies and tools that companies can use to translate an aspiration for sustainability into practical, effective solutions; the seminars provide case studies from around the world.
------------------------	---

7.2. Specific objectives	<p><u>A. Cognitive objectives cognitive</u></p> <ol style="list-style-type: none"> 1. Understanding the role of sustainable strategies and policies in business development; 2. Understanding the principles, criteria and directions of sustainable development in business; 3. Familiarizing students with the methods and tools of analysis specific to the sustainable development management of a company 4. Familiarizing students with the development and implementation stages of some reports and studies necessary in the sustainable management of organizations. <p><u>B. Procedural objectives</u></p> <ol style="list-style-type: none"> 1. Identifying some concrete situations to apply the theories and principles of strategic management in sustainable development of organizations; 2. Collecting and processing data from documentary sources and alternative current activity, developing skills to use the methods, techniques and research tools for making strategic models of sustainable business development. <p><u>C. Attitudinal objectives</u></p> <ol style="list-style-type: none"> 1. Respecting the rules of professional deontology, based on explicit value options of a specialist in management; 2. Cooperation and teamwork to solve various job tasks; 3. Using specific methods to develop plans of personal and professional development.

*** NOTES:**

1. The seminars consists of projects, direct interventions, debates, teamwork etc., activities considered in the final evaluation.
2. The projects are conducted in teams.

9. Course contents corroboration with the demands of the epistemic community representatives, professional associations and related employers.

- the accuracy of using concepts and theories learned during this course will meet employers' requirements;
- the procedural and attitudinal competencies to be acquired during this course will meet the expectations of business professional associations and employers.

Note: The University of Pitești evaluates periodically the degree of satisfaction of the employers' representatives towards the professional and transversal competences acquired by our graduates.

10. Evaluation

Activity type	10.1 Evaluation criteria	10.2 Evaluation methods	10.3 Share of final mark
10.4 Course	- written exam: the quality and consistency of treating subjects; - logical coherence; - assimilation degree of specialized language.	Test papers during the semester	10%
		Final evaluation	30%
10.5 Seminar	- active participation during the seminars, solving the case studies; - compliance with the requirements of the project .	Evaluating student's products and interventions during the seminars	30%
		Evaluating student's participation in project making and presentation	30%
10.6 Minimum performance standard	Minimum requirements for the pass mark 5: achieving the following minimum skills: A1, A2, B2, C1.

SYLLABUS

Tertiary Sector Development Strategies, 2021-2022

1. Program information

1.1. Higher education institution	University of Pitești
1.2. Faculty	Faculty of Economics and Law
1.3. Department	Management and Business Administration
1.4. Field of studies	Management
1.5. Cycle of studies	Master
1.6. Program of studies	Strategic Management and Business Development

2. Course information

2.1	Name	Tertiary Sector Development Strategies									
2.2	Course teacher										
2.3	Seminar teacher										
2.4	Year of studies	II	2.5	Semester	II	2.6	Evaluation type	colloquy	2.7	Course type	Optional

3. Total estimated time

3.1	Number of hours per week	2	3.2	of which course	1	3.3	S / L / P	1
3.4	Total hours from curriculum	24	3.5	of which seminar	12	3.6	S / L / P	12
Time distribution								76 hours
Study the textbook, course support, bibliography and notes								30
Further reading in the library, on the online platforms and field								20
Preparing seminars, homework, portfolios and essays								20
Tutoring								2
Examinations								2
Other activities								2
3.7	Total hours of individual study	76						
3.8	Total hours per semester	100						
3.9	Number of credits	4						

4. Prerequisites

4.1. of curriculum	The basics of Economics, Economy of Services and Economics of Tourism.
4.2. of competences	analysis, synthesis, divergent thinking

5. Requirements

5.1. for courses	The lecture room should be equipped with a video-projector.
5.2. for seminars	Classical seminar room facilities.

6. Specific acquired competences

Professional competences	C1. <i>Evaluating opportunities and risks specific to business environment in order to design organizational changes</i> – 1CP; C2. <i>Making decision scenarios and forecasting their potential impact</i> – 1CP; C3. <i>Applying strategic management systems under certainty, uncertainty and risk</i> – 1CP; C4. <i>Revaluating the entrepreneurial skills in a competitive environment</i> – 1CP.
Transversal competences	

7. Course objectives (based on the specific acquired competences)

7.1. General objective	The course "Tertiary Sector Development Strategies" provides the master students with a conceptual framework on the basics of the tertiary sector development strategies, highlighting the priority areas and strategic objectives for the sustainable development of services in Romania.
7.2. Specific objectives	<p>A. Cognitive objectives</p> <ol style="list-style-type: none"> 1. Knowing and understanding the different concepts specific to the macroeconomic policies in the tertiary sector. 2. Describing the concepts, theories and methodologies to collect, process and analyze the data regarding the development strategies of the tertiary sector. 3. Applying strategic and tactical actions within the company, according to its core policy. <p>B. Procedural objectives</p> <ol style="list-style-type: none"> 1. Developing systems, capabilities and strategies for sustainable service

	<p>development.</p> <ol style="list-style-type: none"> 2. Developing comparative analyzes for a project of service development project. 3. Applying macroeconomic policies to different development regions. <p>C. Attitudinal objectives</p> <ol style="list-style-type: none"> 1. Respecting the rules of professional deontology, based on explicit value options of a specialist in services. 2. Managing a positive and responsible attitude toward the role and importance of services in the economic and social activity. 3. The ability to have an ethical behavior in front of tourists, business partners, employees.
