

Mission and objectives

The university doctoral field of Science of Sports and Physical Education fulfils the following mission and objectives:

The mission of the doctoral studies field in the Science of Sports and Physical Education is consistent with the mission of the National University of Science and Technology POLITEHNICA Bucharest, as defined in the University Charter, by promoting excellence in education, scientific research, and innovation. The field aims to train highly qualified specialists and researchers who can generate original scientific knowledge and contribute to the development of physical education, sports performance, health, and society, in line with European standards and the strategic goals of the University.

The objectives of the doctoral field:

- to develop advanced scientific research skills, including the implementation of modern research methods and techniques;
- to strengthen the capacity to design and implement interdisciplinary research projects;
- to promote academic integrity and ethics in research activity;
- to develop skills in data processing, analysis and interpretation using modern technologies and digital tools;
- to enhance scientific visibility by publishing and disseminating the research results at national and international levels;
- to strengthen the skills of academic communication and integration into the international scientific community;
- to consolidate national and international academic and interdisciplinary collaborations;
- to develop the capacity for knowledge transfer to the socio-economic and sports sectors.
